May-Lan Tree Plantation is now the ONLY place on the East Coast to offer to the public the chance to own the rarest of rare breeds, that which has been kept secret for centuries by those who were fortune enough to capture or find one who had been tamed by another, ...the flying pig.

Yes, you read correctly! No longer will the privileged be the only Humans to enjoy countless hours of relaxation while watching their flying pig soar. This aerodynamic wonder can stay aloft longer than you ever dreamed.

We offer not one BUT TWO breeds --- the stealthy round-tail and the daring flat-tail. Adults and piglets---ALL are house ready! Each flight tested and certified. Although you may keep your flyer outdoors, we do advise containment during evenings to avoid their one weakness---buzzing the interstates and putting out UFO signals on radar. This tends to upset the Air Force guys.

Adoption papers, starter fluid and feed are included. A super gift for the person who thinks they know it all or, just hog it for yourself.

Remember, it is not real if it does not have the May-Lan mark!

HAPPY FLYING!!!!!!!
